

DEAR Fortnight – Book Review Challenge

***We Should All Be Feminists* Book Review**

I thought the book *We Should All Be Feminists* was really inspiring because it brought up many issues that I have thought about before but had started to think was me being dramatic. It brought up issues about how men were/are preferred to women and how women are not seen as important as men. My favourite part was when she talked about how many children (girls and boys) were taught standards: e.g., for girls, you need to impress your husband and cook and clean and care for your children; for boys, you need to go get a job and support your family. One of the many parts that was interesting was that when a man takes their child to nursery, they get a round of applause for being 'such a good dad' but for women it is a standard. Overall, I thought it was a really inspiring book.
